

Music Technology Advanced Higher

Why take this course?

This is a new course for 2019/2020 for the whole of Scotland. It follows on from concepts learned at Higher level. It is research and project based and has scope for pupils to deepen knowledge of their chosen area of focus.

To succeed in this course, you need...

The ability to work independently is crucial as you will need to organise project proposals and develop deeper understanding of recording and mixing techniques and technological concepts.

Course structure and content (subject to change by SQA).

There are two areas of assessment:

1. Research Project, once you have identified a focus area in Music Technology you will design a research project experimenting and drawing conclusions. This will take the form of a research essay.
2. Multi-track project, similar to the Higher final assignment you will design and complete a Music Technology brief focusing on recording, mixing and production techniques.

Where might this course take me?

This course is designed to help you deepen your understanding of Music Technology and is an excellent step toward a University Music Technology course or a job in the Music industry.
